PUBLIC URINALS**

Introducing Eco Paryavaran's revolutionary innovation

OzoUrinodeodor™

Experience the pleasure of fresh breathing

Say goodbye to unpleasant odors and unhygienic conditions in public restrooms with our innovative solution.

Public urinals in India often suffer from neglect, lacking regular maintenance, cleaning staff, and essential supplies, which results in the generation of foul-smelling chemicals and the accumulation of harmful bacteria, creating an unwelcoming atmosphere for users.

OzoUrinodeodor™ is a portable and user-friendly device that tackles these issues head-on. Utilizing only 'air and electricity,' it generates ozone in a controlled manner, effectively neutralizing odor-causing molecules and bacteria.

Unlike traditional methods such as bleach powder **OzoUrinodeodor™** provides a comprehensive and long-lasting solution to the odor problem. Our product is a game-changer in the industry, offering simplicity and efficiency. Placed strategically in the urinal space, **OzoUrinodeodor™** releases ozone into the air, eliminating unpleasant odors at the source.

Eco Paryavaran is committed to environmental sustainability. By choosing **OzoUrinodeodor™**, you not only enhance the user experience but also contribute to a cleaner and greener world.

Join us in revolutionizing public restroom hygiene – experience the power of **OzoUrinodeodor™** today!

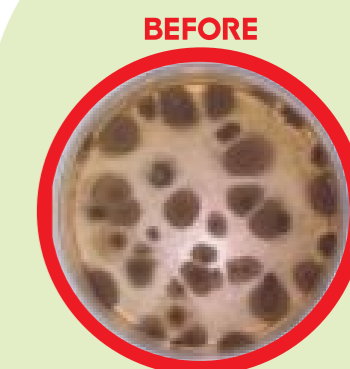

OzoUrinodeodor™
Experience the pleasure of fresh breathing

Key Features & Benefits of OzoUrinodeodor

- ☑ OzoUrinodeodor™ supports the realization of the Government of India's 'Swachh Bharat Mission' by ensuring user-friendly urinals in public places. Operating on a 220V, 50 Hz, 5A
- ☑ power socket, this innovative solution provides instantaneous ozone generation upon activation, significantly reducing the smell of urinals and decontaminating exposed surfaces.
- ☑ By adopting OzoUrinodeodor™, establishments can save on routine deodorizing chemicals and manpower expenses.
- ☑ It has the potential to contribute to water conservation in urinals. The system can be automated with an ozone sensor, enabling seamless and efficient operation.
- ☑ With zero maintenance requirements and the possibility of unmanned operation, OzoUrinodeodor™ utilizes only electricity and air as raw materials

TECHNICAL SPECIFICATIONS

Plate type corona discharge ozone generator.	OZOURLINODEODOR™ RANGE (Models)	5x
	WEIGHT (kg)	5
Mobile and Handy, Self contained units.	DIMENSIONS (L*B*H) (mm)	280*180*180
	POWER CONSUMPTION (w)	55w
Power Supply 220V, 1ø, 50 Hz.	FOOTFALLS/DAY (No. of persons)	Upto 300
	AREA Covered (Sq. Ft)	≤200

Actual lab tests showing more than 99% reductions of airborne bacteria and mold
