## Eco Paryavaran Engineers & Consultants Pvt. Ltd

PROVIDING STATE-OF-THE-ART TECHNOLOGY SOLUTIONS UNDER ONE ROOF FOR A SUSTAINABLE, GREEN WORLD.

The rising awareness among people with regards to the environment and the effects of sustainable planning has contributed to the rapid growth of the Environmental Consulting market. The market is currently at its best and is continuously evolving, particularly in the sectors of environment impact assessment, water & waste management system, contaminated land services, environmental management services and climate change & energy. This, according to Dr. Sandeep Garg, MD at ECO Group has largely benefited his organization. Established in 1998, ECO Group is an environmental organization that offers consultancy and turnkey solutions for overall pollution abatement in the field of air, water, noise, and soil. "Our company is positioned no. 1 in the market as it is one of its kind company, we have all the environment management consultancy services, state of the art pollution testing laboratory, manufacturing facility, technologies for pollution control & management at all the stages of the project, under one roof as a one stop solution," says Dr. Sandeep. Eco Group has two major business divisions, which are, **Eco Paryavaran Engineers & Consultants Pvt. Ltd. and Eco Laboratories & Consultants Pvt. Ltd.**

The company has provided its services to more than 1200 companies, some of which include Ambuja Cement, Philips, ACC Limited, Dabur, Colgate, Mahindra & Mahindra, Godrej

Consumer Products, Loreal, Max Hospital, Tirupati Medical, Danone Nutricia, Vardhman and Trident. The professionally qualified team at ECO Group provides technically sound and environment friendly solutions through their research based skills. "We are giving our best services in our field and consciously developing our creativity and ability to think beyond the normal, tried and trusted solutions to provide clients with innovative solutions and proposals," adds Dr. Sandeep.

The company's emerging, innovative and scientific solutions such as Nanobubble Generator (NBG) for water and wastewater treatment improves energy efficiency and dissolved oxygen levels with lower running costs and higher profits, for all industries requiring large quantities of water as raw material such as distilleries, water packaging industry, food industry and more. One of the company's flagship, 'a mechanical composter', a solid waste management technology of "EcoSter", is state-of-the-art technology for treatment and disposal of organic solid waste at institutional level. It is a hassle free, hygienic, energy efficient and automated composter built in line with the Solid Waste Management Guidelines, 2016. EcoSter is useful for institutions, hotels and housing group projects that cater to more than 100 kg of waste per day.

For over a decade, the company has successfully conducted environment impact assessment studies and audits for various strata across India. ECO Group provides best infrastructure, machinery and state-of-the-art technologies including STP/ETP, skid mounted STP's, ultrafiltration plants, reverse osmosis plants, evaporators, wet & dry scrubber,

bag house filters and fume extractors. Further, with its fully-equipped ECO laboratories, including air laboratory, water laboratory, soil & sludge testing laboratory and mechanical laboratory, the company provides speedy results for various types of testing and analytical services.

Eco Group also has an NGO registered under Societies Registration Act XXI of 1860, as "Environment Matters", which is working towards bridging the gap between the academia, industry and community. 'Environment Matters' as a brainchild of Dr. Sandeep Garg is dedicated towards CSR, R & D Projects and Community awareness activities at local, regional and international levels.

With a history and tradition of more than 20 years, our group is nurturing a strong ecosystem that provides a wide range of services and products related to environmental protection and conservation.

As for the future, Eco Group's plan is to provide its services around every nook & corner and to expand it's boundaries nationally and globally. With a dedicated engineering team & extensive sales and support network, the company is gearing up to provide complete environmental solutions to its customers under one roof. With the Government increasing stringency of investing in environmental regulations and policies to be implemented by businesses, industries, and even households, we believe our company will experience scaling heights, through contribution to sustainable development," concludes Dr. Sandeep. ||
